VFE Rocket EQ 3-BAND EQ + CLEAN BOOST, HIGH END  
BOUTIQUE PEDAL SUPERB SOUND!!!

Sussex Bargains

## VFE Rocket EQ 3-BAND EQ + CLEAN BOOST, HIGH END BOUTIQUE PEDAL SUPERB SOUND!!!

Model : -

Manufacturer : -

The ROCKET EQ provides dual shelving filters plus a fully parametric band, for the ultimate compact EQ boost pedal. The parametric band has an ultra-wide frequency and Q range, and we spared no expense in this update - using 4 OPA2134 high-fidelity op amps and 25 low-noise, audio-grade resistors made by PRP in Iowa. To top it off, the ROCKET EQ employs an internal charge pump for double the clean headroom off a standard 9V supply. To see great demos of this pedal click here:

<http://www.vfepedals.com/rocket-eq.html> Dimensions:

Enclosure dimensions: 2.37"W x 4.37"L x 1.16"H (60 x 111 x 29mm) • With knobs & jacks: 2.6"W x 4.4"L x 2.1"H (66 x 111 x 53mm)

Power: • Standard 2.1mm, negative-tip 9V to 15V power supply or 9V Battery Input Impedance: • 1.8m Ohm Current

Draw: • ~40mA Continuous • +30mA surge for 4ms during

On/Off Switching By The Numbers: • 30 Resistors • 28

Capacitors • 1 Inductor • 2 Transistors • 5 Diodes • 4 OP

Amps • 3 Integrated Circuits • 7 Potentiometers • 2 Switches • 3

Jacks • 2 Circuit Boards The Story: "The Rocket EQ is the

result of repeated attempts to put the flexibility of a parametric

EQ in a format that doesn't take up a large amount of

precious pedalboard space. Over the years, there have been

many revisions, with the latest version finally achieving the

tonal versatility I envisioned when designing the first prototype

back in 2009. If you are looking for a pedal to give your amp a

little something extra, or take away an offending frequency,

create a stuck wah sound, or give a gentle mid boost for

standing out the mix, the Rocket EQ can do that...and a whole

lot more." -- Peter Rutter, founder of VFE Pedals --

**Price : £169.95**
