Hagstrom Tremar Super Swede Electric Guitar & Fitted Hard Case Here we have one of Hagstrom's finest models in perfect working order and near new condition. NO Fret wear or any other signs of use. There are great reviews and excellent demos of this incredible guitar on the web and YouTube. This guitar has been professionally amended and each of the Humbucker pickups can be split to single coil by pressing (push-push) the tone knob for each pickup. There is also a little toggle that acts as a 'kill' switch. The action on the guitar is sickeningly low without choking or buzz. The sound is open and immense (listen to the demos online). The fantastic ebony fretboard and mahogany body produce killer warm sounds. This guitar can be lined up together with any Les Paul. The tremolo works like a dream and, if not used with wild dives, it maintains itself in tune. You can see this in GuitarWorld videos online. The guitar comes in its own Hagstrom dedicated hard case (see picture 9) which is robust and in good aesthetic condition.
