Decibel Eleven MIDI Loop Expander

Model : -

Manufacturer : -

Here we have the marvellous Decibel Eleven Loop Expander MIDI pedal. This has been lightly used, but remains in excellent condition and works perfectly. There is Velcro underneath, so it is ready to go directly onto your pedalboard! Manufacturer's Blurb: Product

Description: The Decibel Eleven Loop Expander® is a true bypass audio switcher that adds programmable effects loop switching to any MIDI controlled setup. Use it to add loop switching to any existing system with a simple MIDI controller, or utilise it to expand the number of true bypass loops with a DB-11 Pedal Palette® or Switch Dr.® For larger rigs, connect multiple Loop Expanders® in a series to create additional loops. DB-11 Loop Expander® works with MIDI Program Changes or MIDI Control Changes. The compact size mounts conveniently underneath pedals or on a rack shelf. Product Specifications: • 4 relay true bypass audio loops • Optional 4th loop as amp switch • Switchable Class-A discrete input buffer • Compact size for mounting underneath pedals or on a rack shelf • Multiple Loop Expanders can be connected in series • Works with MIDI program changes or MIDI control changes • Expand loops on DB-11 Pedal Palette or Switch Doctor • 3 year warranty • Dimensions: 6.34" (W) x 4.73" (D) x 1.20" (H) • Weight: 1.3 lbs

Price : £149.99
