Musikraft Natural Ash Custom Pro USA Handmade - Dream Guitar, Very Fast Neck!!!

Model : -

Manufacturer : -

Product Description: A spectacular brand new and unused Musikraft Custom Pro Electric Guitar in the style of top Tom Anderson and Suhr guitars. The components and the built of this stunning professional guitar have been commissioned and sourced by a famous British luthier. The fabulous guitar has a birds-eye Canadian maple neck with 24 medium jumbo frets. The neck is extremely fast very low action and no buzz or chokes. There is a special contour which allows you to reach the neck all the way to the top with ease. The guitar has a very low action and an extremely comfortable modern C / D neck shape. It's between Ibanez Wizard II and modern Fender profile neck with nut width 1 11/16" (43mm). The medium jumbo frets and radius of 12" make the fingerboard flat and great for bending strings, legato playing, and vibrato. There are no dead-notes, buzzing or fret wear. The body is made of 2 pieces of ash wood. It has a professional Floyd Rose factory fitted and everything works smoothly to the state of perfection. Original Floyd Rose tremolo arm included. Electronics include the EMG 89 in the bridge and neck (brand new) and slightly used EMG SA in the middle. There are two tone controls, one for the neck and middle and one for the bridge. The tone controls are also push/push, which enables you to split each of the EMG 89 from humbuckers to single coils separately. This helps to create the famous 'twangy' Stratocaster sound, as well as Telecaster sounds. In addition there is a toggle which engages the bridge pickup with the neck or bridge pickup with neck and middle. All in all the guitar produces around 15 sounds which covers Les Paul sounds, Stratocaster and Telecaster. The EMGs are powered by two 9v batteries, wired as an 18v which give the pickups more headroom, dynamics and greater life. The guitar sounds awesome!!! And all sounds are very useful. Naturally the EMGs are hum free and noiseless, glorious PickUps. The guitar is really a shredder's dream, but easily can be used for rock, blues, metal, progressive rock and alike. It has been fitted by a professional luthier and the pictures really don't do justice to the beauty of the wood. The neck itself would cost more than £400 to import and together all the parts including the electronics worth more than £1,300 without the work to assemble it. Please Note: You're more than welcome to come and try it with your equipment. If you would like to try before you buy and/or you have any questions please feel free to contact me.
