

1980/90s Ernie Ball Vintage Volume Guitar Foot Pedal

Model : -

Manufacturer : -

Vintage Ernie Ball 1980/90s Volume Pedal. This is your classic workhorse of a volume pedal praised by many collectors. Its clear sound and easy to use design is great for all types of players. You will only see these vintage Ernie Ball pedals used by Guitar God Mark Knopfler and not the ones made after. This pedal is far better and superior compared to those made in Mexico! Cheap volume pedals can thin out your sound! Don't do it! Get the real deal and the one with the level knob! Made right the first time. A wonderful universal volume pedal great for lap steel, guitar, bass, organ etc! Used but in perfect working order and good condition for its age. Please note: I have another two of these - one with an additional 1/4" TRS female socket customised so that when you roll off the volume the socket still fits your tuner and the other with a velcro base. If you want one of these, please specify when ordering.
