

## VFE Rocket EQ 3-BAND EQ + CLEAN BOOST

Model : -

Manufacturer : -

Here we have the fabulous VFE Rocket Eq! The ROCKET provides dual shelving filters, plus a fully parametric band, for the ultimate compact EQ boost pedal. The parametric band has an ultra-wide frequency and Q range. Rocket we spared no expense in this update - using 4 OPA2134 high-fidelity op amps and 25 low-noise, audio-grade resistors made by PRP in Iowa. To top it off, the ROCKET EQ employs an internal charge pump for double the clean headroom off a standard 9V supply. There are numerous fantastic demos and glorious reviews on the web for this amazing pedal. Dimensions:-

Enclosure dimensions: 2.37" x 4.37" x 1.16"

(60 x 111 x 29mm) - With knobs & jacks:

2.6" x 4.4" x 2.1" (66 x 111 x 53mm)

Power:- Standard 2.1mm, negative-tip 9V to 15V power supply or 9V battery. Input Impedance:-

1.8M-ohm Current Draw:- ~ 40ma continuous + 30ma surge for

4ms during on/off switching By the Numbers:- 30 Resistors- 28

Capacitors- 1 Inductor- 2 Transistors- 5 Diodes- 4 Op Amps-

3 Integrated Circuits- 7 Potentiometers- 2 Switches- 3 Jacks-

2 Circuit Boards THE STORY: As someone who got their start

playing acoustic guitars, I prefer compressor pedals that

don't sound like an effect. I want my transparent tone

from top-to-bottom to stay true, but then add some smooth

levelling and sustain to help the guitar stand out in the mix. In

the quest to build the perfect compressor, I tried many things,

and finally narrowed it down to the features that matter most

for guitar and bass. The White Horse can add loads of sustain

with natural dynamics via the blend circuitry, but the unique

drive control is what really sets it apart. This control balances

the circuit between clean and dirty compression, giving you a

responsive drive that stacks well with your dirt boxes. -- Peter

Rutter, founder of VFE Pedals -- Visit
